

1. Part Time Instructors

Supplementary to Happenings #12 item 2. Correction re Dr. C. Pilot. He will only teach Physics C436. This will be given on T, Th at 10:15 - 11:45. Dr. P. Sullivan currently a post doctoral student at McGill in experimental Solid State Physics will teach C205 BB and Mr. G. Johnson from the science department at Marianopolis will teach Physics C204 BB. Mr. Johnson holds a BSc from McGill and an MSc in Physics from Concordia.

2. Graduate Appraisal

The Committee held very amiable talks with Dr. Misra and Dr. Kalman recently. The report of the external appraiser, Dr. Daniels is expected shortly.

3. January Undergraduate Enrollment

27 Applications have been received. Most of them are majors, and most have already seen Dr. Eddy about courses to be taken in the Spring Semester.

4. January Graduate Enrollment

2 New students are confirmed for January (L. Sanabria and P. Poirier) and at least 2 more have been offered admission. Two more desks have been ordered for the graduate offices. This will fill the rooms to capacity.

5. Courses Approved; Calendar Changes

Courses Phys. C384 Introduction to Astronomy and Phys. C385 Astrophysics have been approved by Senate and will appear in the next Calendar. The description of Phys. C434 Thermodynamics has been changed to read that it should not be taken before second year of University studies. Physics C497 Experimental Atomic Physics II has been deleted as part of our course offerings. Finally the slot courses have been renumbered. 3 credit slot courses: Phys. 298, 398, 498. 6 credit slot courses: Phys. 299, 399, 499.

6. Exhibit at Stewart Hall

Physics participated in a highly successful exhibit in Stewart Hall, Pointe Claire. Over 1000 people visited the display. Tara Curtis and Mostafa Showleh handled a Tesla Coil demonstration and Mark Hooper and Richard de Romer illustrated the use of lasers. All put in a great deal of time and effort. They certainly did a good job as there was always a crowd around the exhibits. The programme director at Stewart Hall was ecstatic over the showing. Congratu-

lations on your magnificent success. Mustafa, Tara, Mark and Richard.

7. Phone Service

With the initiation of Centrese III, it will be possible for all professors to once again have calls answered by a secretary when you are absent from your office. Many additional features will also be available. If your line is busy a new call will automatically be transferred to a secretary's line. It will also be possible to put a call on hold if you are talking to someone in your office. The changeover is scheduled for July 15. At that time your local 4 digit phone number will remain unchanged, but the 879 prefix will be changed to 848.

C. S. KALMAN,
CHAIR,
PHYSICS DEPARTMENT
